

Educational Standards and Sustainability of a Hysteric Society

Igor Khmelinskii, PhD, Prof. Agregado,
Peter Stallinga, PhD, Prof. Agregado,
Universidade do Algarve, FCT & CEOT,
Faro, Portugal

Seminar «SUSTAINABLE DEVELOPMENT AND SOCIO-ECOLOGICAL
STANDARDS IN SCIENCE AND EDUCATION»

Moscow, May 23-24, 2019

Your beliefs and reality: cognitive dissonance

- How do you like me and my Trump cap?
- You don't. Why:
 - “Mr. Trump is an idiot as we all know” (why?)
 - Consequently the same applies to me
- You were brainwashed into this in just about 3 years
- And yet:
 - Mr. Trump is a successful businessman
 - Show me your billion dollars if you are smarter!
 - He was elected President of the USA!
 - I have about 200 peer-reviewed publications in chemical physics
 - Without my own laboratory or institute or grants!
 - And a long experience in 2 different systems of higher education ...

Where are we?

Sociopathic globalizers: transnational monopolies, UN, politicians, media, church

Today: Orwellian post-truth post-science society

“Discrimination is equality”

“Freedom is slavery”

“War is peace”

Sustainability agenda

Tomorrow:

chip-controlled technocratic slavery

We the people... (from the US Constitution)

How did we get here?

What

Global warming
“Atmospheric CO2 will
cause climate catastrophe”..

Climate change
“Any weather event is
evidence of climate change”

Ecology (Climate change
pseudoscience) at school and
university

Who (how)

Institutionally corrupt
science (grants, target
programs)

Institutionally corrupt
media (owner-defined
attitudes: fake news)

Institutionally corrupt
education (mobility &
research grants)

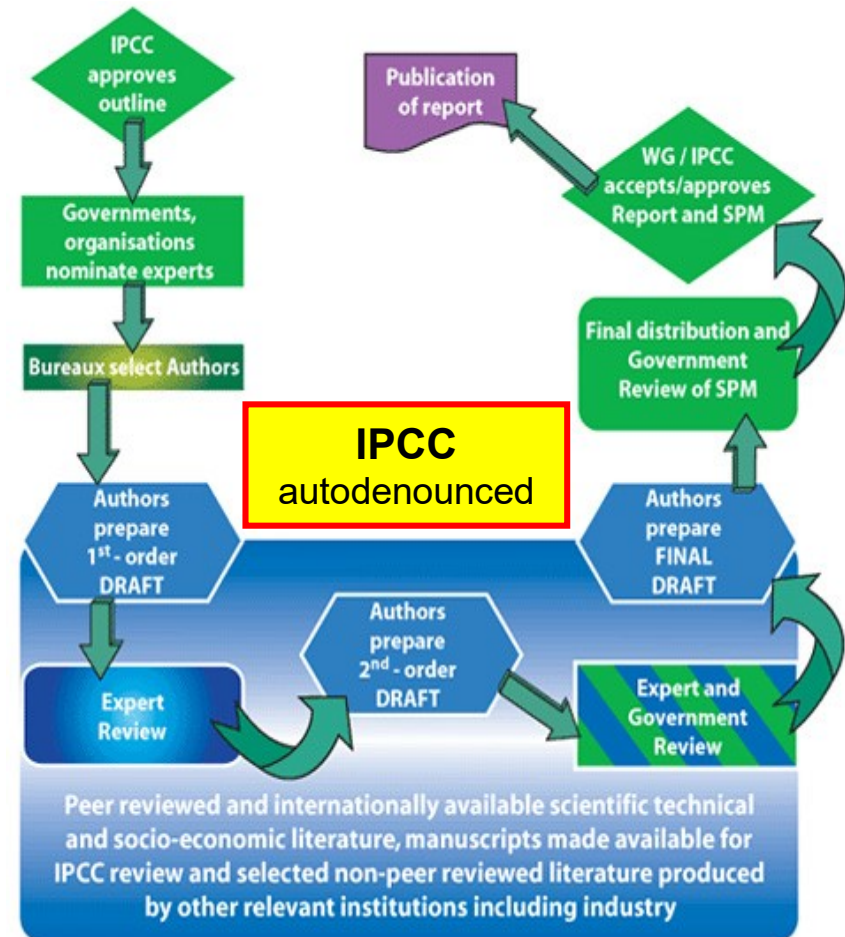

Hold on to your chair!

- “Global warming” is nonsense
- It was brainwashed into you for 30 years
 - And into your children right now
- Consequently, the sustainability agenda is a fake
 - Based on “climate change” pseudoscience

IPCC pseudoscience

- Conclusions generated by management methods
 - As they detail on their web pages
 - Write conclusions first
 - Next choose papers/texts that support their conclusions
 - Which allegedly proves their models (**LOGICAL ERROR**)
- As opposed to the Scientific Method (Popper)
 - Eliminate some of the plausible hypotheses by experimental evidence
- With the help of public grants
 - And accelerated by peer review
 - Reviewers don't like papers contradicting their ideas
 - Public pressure by "climate change" research programs

IPCC are wrong

- Fundamentally wrong approach can only generate wrong conclusions
 - As many theories and there are theorists, but only one reality. Infinite possibilities of error.
- CO2 can't be the reason of growing temperatures
 - CO2 changes **AFTER** temperature, at all time scales
- CO2 is good for our well-being
 - Right now we are getting 19% of all natural produce because of extra CO2
- Higher temperatures are good for our well-being
 - Prosperity is caused by higher temperatures
- Sun is the main factor of our climate
 - Similar climate changes occur on Earth, Mars and Jupiter (was hotter, getting colder)

U.N. Predicts Disaster if Global Warming Not Checked

PETER JAMES SPIELMANN June 29, 1989

IPCC consistently wrong

UNITED NATIONS (AP) – A senior U.N. environmental official says entire nations could be wiped off the face of the Earth by rising sea levels if the global warming trend is not reversed by the year 2000.

Why fake the data?

- If IPCC were right, and the problem really existed, why the need to fake research results?
 - US climate record faked by eliminating rural weather stations
 - Which generated the temperature growth trend during the 20th century
 - EU climate records faked
 - Reducing historical temperatures to increase the growth trend
 - Climate Stick scandal
 - Climategate emails
- It is all scientific misconduct! (multiple instances of Falsification)

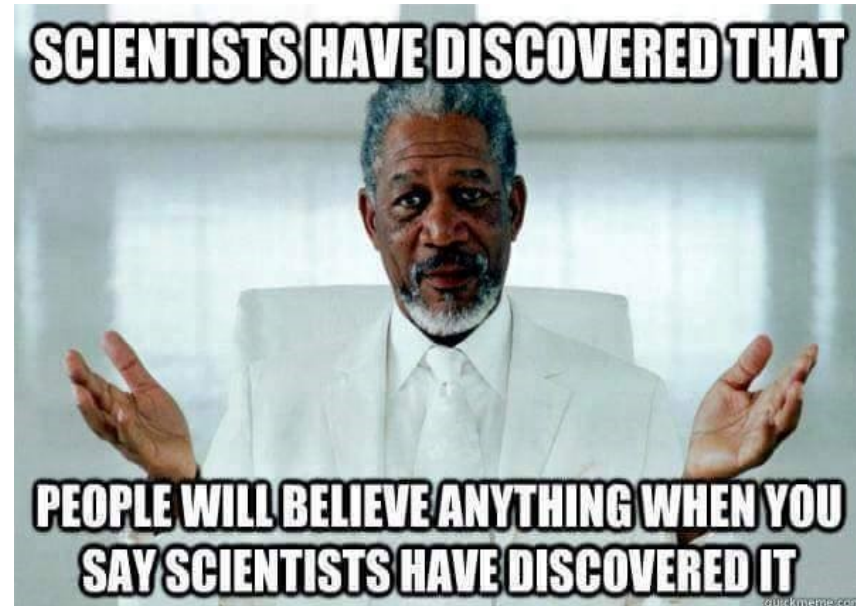

<https://www.allea.org/publications/joint-publications/european-code-conduct-research-integrity/>

Wrong problems - wrong solutions

- Sustainability measures: **counterproductive!**
 - Reduction of atmospheric CO₂
 - Geo-engineering to reduce solar radiation
- Becoming a real **food security risk!**
 - Decay of solar activity during this century
 - Ongoing; will hit the bottom in some 20 years
 - New Maunder-type solar minimum
 - Temperatures going back to year 1850
 - Lower agricultural/natural yields (lower temperature)
 - More earthquakes and volcanism this century (galactic cosmic rays)
 - Catastrophic eruption could **eliminate summers** for a decade!
 - Causing mass hunger on planetary scale
 - 10 to 20 million people die of hunger in Africa annually today
- Must increase atmospheric CO₂ as a preventive measure!

Education: to do

- Drop global warming/ climate change from school curricula
 - It has no basis in science
- Wrong paradigm: get back to learning things by heart
 - Modern school: students are free from knowledge
 - Your children never acquire abstract thinking (need to know definitions!)
 - Uphold their morals, now degraded by copying & imitating critical thinking at primary school!

But: science can prove nothing, it can only disprove things!

Research: to do

- Shut down climate research programs
 - Waste of public resources
- Shut down IPCC
 - Global-scale food security risk
- Use the money to teach Africans to produce their own food!

Thank You for attention!

- If you take cold weather records all over USA this winter (150+ localities) and snow in April in Athens as proof of dangerous global warming, you are hysterical on weather! (*not healthy for you*; also, you don't know what climate is...)
- Questions, please?

Ossónoba Philosophical Society:
Nullius in verba

<http://www.ossobaphilosophicalsociety.org/>

Science is not a democracy and not decided by vote

Thank You for attention!

In questions of science, the authority of a thousand is not worth the humble reasoning of a single individual.

(Galileo Galilei)

izquotes.com

<http://www.ossonobaphilosophicalsociety.org/>

Science is not a democracy and not decided by vote

Fake concepts

- Writing off “carbon emissions” proportionally to existing forests???
 - A forest overall is a zero-carbon-balance system: organic matter accumulates & always transforms back into CO₂ (forest fires!)
- Doomsday clock???

Re multimedia materials on climate change

Three types of lies:

- Naive lie
- Outrageous lie
- Statistics (read Science)

They want your vote and your money!
